Technologies for Academic Success

**START HERE**

Getting Ready

Fri Jul 10

Ready to get skilled up for success with technology as a student? Start here to find out what it takes to begin this course.

THEME 1

Getting Your Tech Together

5 Topics

Fri Jul 17

What technology and tools will help you find success at UH? Topics in this theme will help prepare you for face-to-face and online classes.

THEME 2

Research & Writing

4 Topics

Wed Jul 29

What are the essentials of research and writing as a student? Topics in this theme will help with citing and organizing your research, then using it in your own writing.

Getting Your Tech Together– Web Conferencing

● Core

Objectives

Students will...

- install launcher and enter a BBC session.
- complete the BBC audio setup wizard, verifying a working headset and microphone.
- use interaction icons, chat and audio & video panel options.
- understand the pros/cons of transmitting video.
- manage mic and speaker volume in session.
- understand that phone dial-in is available, but that charges may apply and that your audio is always on.

Introduction

Blackboard Collaborate (BBC) is a [web conferencing](#) tool, allowing for online [synchronous](#) class sessions. Many online courses hold web conference meetings on specific days and times and require students to attend online. BBC is a tool commonly used at UH as an “online classroom” as it recreates aspects of a face-to-face classroom: participants meet together at the same time, can speak and have everyone in the room hear and see them, slides and other media can be shared, and classes can be broken into smaller private working groups. Just as it’s important to attend your face-to-face classes and know how to behave in them, it’s important to attend your online synchronous class sessions and know how to use the “classroom” tools.

Click on the dropdown menu next to the Audio Setup Wizard icon, and choose options within the list.

The dropdown menu from the Audio & Video panel in BBC.
